

## Study Programmes: Work experience

This programme is an individualised programme for 16-18 year olds who want to work, but who need extra help to gain employment with accredited training, an apprenticeship or carry on with further education. Our work experience programme will give you the opportunity to develop the skills and workplace experience that employers require for your long term development and career. You can choose any sector you would like to work in.

We work closely with a large number of committed and supportive employers across the county who can provide you with valuable and vital experience. You will be able to complete accredited employability qualification, create your CV, complete applications and participate in mock and guaranteed interviews.

**Please contact 01452 300255 and quote:**
